HEIGHT AND POSITION OF MOUNT ST. ELIAS.

BY

ISRAEL C. RUSSELL.

(Laid before the Board of Managers December 11, 1891.)

The height and position of Mount St. Elias have been measured several times during the past century with varying results. The measurements made prior to 1891 have been summarized and discussed by W. H. Dall, of the U. S. Coast and Geodetic Survey.* The various results obtained are shown in the following table. With the exception of the position determined by Malaspina and the measurements of 1891, they are copied from Dall's report.

Height and Position of Mount St. Elias.

| Date. | Authority. | Height. | Latitude. | Longitude. |
|-------|---|--------------|--------------|---------------|
| 1786 | La Pérouse | 12,672 feet. | 60° 15' 00'' | 140° 10' 00'' |
| 1791 | Malaspina | 17,851 " | 60 17 35 | 140 52 17 |
| 1794 | Vancouver | | 60 22 30 | 140 39 00 |
| 1847 | Russian Hydrographic Chart, 1378. | 17,850 " | 60 21 00 | 141 00 00 |
| 1847 | Tebenkof (Notes). | 16,938 " | 60 22 36 | 140 54 00 |
| 1849 | Tebenkof (Chart VII). | 16,938 " | 60 21 30 | 140 54 00 |
| | Bach, Cam. Inscr. | 16,758 " | 60 17 30 | 140 51 00 |
| 1872 | English Admiralty Chart 2172 | 14,970 " | 60 21 00 | 141 00 00 |
| 1874 | U. S. Coast Survey. | 19,500 400 " | 60 20 45 | 141 00 12 |
| 1891 | Nat. Geog. Soc. Ex. | 18,400 400 " | 60 17 51 | 140 55 30 |

The position given by Malaspina is from a report on astronomical observations made during his voyage,† which places the mountain in longitude 134° 33' 10" west of Cadiz. Taking

* Rep. of the Superintendent of the U. S. Coast Survey for 1875, pp. 157-188.

† Memorias sobre las observaciones astronómicas hechas por los navegantes Españoles en distintos lugares del globo; Por Don Josef Espinosa y Tello. Madrid, en la Imprenta real, Año de 1809; 2 vols., large 8°; vol. I, pp. 57-60. My attention was directed to this work by Dr. Dall, who owns the only copy I have seen.

the longitude of Cadiz as $6^{\circ} 19' 07''$ west of Greenwich, the figures given in the table are obtained.

The data from which the various determinations made previous to 1874 were obtained have not been published. The observations made by Messrs. Dall and Baker, of the U. S. Coast and Geodetic Survey, are published in full in the annual report of that Survey for 1875, already referred to. The observations made by myself last summer as a part of the work of an expedition sent to Mount St. Elias by the National Geographic Society and the U. S. Geological Survey, from which the height and position of the mountain have been computed, are as follows:

A base line 16,876 feet long was measured on the beach at Icy bay. The line, with the exception of section *C* to *D*, as shown below, was measured three times in sections of about 3,000 feet each. The distances given below in columns 1 and 2 were obtained with a 100-foot steel tape, and those given in column 3 with a 300-foot iron wire. These are rough measurements, made without the use of a plumb-bob and without taking account of temperature. The ground was quite smooth, with a rise of about five feet in the center; but section *C* to *D* was crossed by a stream channel about 300 feet broad and twenty feet deep. Throughout much of the distance the ground was covered with grass, which was only partially cleared away. The stations at the ends of the line were ten feet above high tide. The bearing of the line from the western base was $S. 89^{\circ} E.$, magnetic.

Measurements of Base Line.

| | 1. | 2. | 3. | Mean. |
|--|-----------------------|-----------------------|-----------------------|-----------------------|
| | <i>Ft.</i> <i>in.</i> | <i>Ft.</i> <i>in.</i> | <i>Ft.</i> <i>in.</i> | <i>Ft.</i> <i>in.</i> |
| Western base to station <i>A</i> . . . | 3,179 10 | 3,178 7 | 3,178 9 | 3,179 1 |
| Station <i>A</i> to station <i>B</i> | 2,355 2 | 2,354 1 | 2,354 2 | 2,354 6 |
| Station <i>B</i> to station <i>C</i> | 3,589 0 | 3,587 9 | 3,586 0 | 3,587 7 |
| Station <i>C</i> to station <i>D</i> | Rejected. | 2,609 2 | 2,609 5 | 2,609 3 |
| Station <i>D</i> to eastern base | 5,145 5 | 5,144 10 | Not measured. | 5,145 1 |
| Length of base line | | | | 16,875 6 |

The measurements of angles were made with a gradienter reading by vernier to minutes. The error of the vertical arc was $-3'$, and remained constant during the observations.

| Mean, 98° 29' 12" | | | + 5° 43' | 76° 7' 10" | + 5° 37' |

The known elements of the triangle from which the distance of St. Elias from the ends of the base line may be determined are :

These data were sent from the field to the Secretary of the National Geographic Society, and, in connection with other measurements made at the same time, have been computed by

Mr. S. S. Gannett, of the United States Geological Survey. The results of the computation, so far as they relate to Mount St. Elias, are given below:

Computation of the Height of Mount St. Elias.

| <i>Station.</i> | <i>Long.</i> | <i>16,876 ft. long.</i> | | |
|-----------------|--------------|-------------------------|---------|-----------|
| St. Elias | 5° 23' 38" | Dist. W. base | W. base | 4,227,270 |
| Western base | 98° 29' 42" | A. C. log. sine | | 1,026,862 |
| Eastern base | 76° 07' 40" | log. sine | | 9,995,248 |
| | | log. sine | | 9,987,129 |
| | | St. Elias — W. base | | 5,244,264 |
| | | St. Elias — E. base | | 5,249,350 |

| | <i>log. feet.</i> | <i>log. miles.</i> | <i>miles.</i> |
|------------------------------------|-------------------|--------------------|---------------|
| Log. distance: St. Elias — W. base | 5,244,264 | 4,548,627 | 33.04 |
| Log. tan angle of elevation 5° 43' | 9,900,065 | | |

| | | | |
|--------------------------|------------|-----------|--|
| | 1,7447 ft. | 4,244,726 | |
| Curvature and refraction | 623 | | |
| Western base above sea | 10 | | |
| St. Elias above sea | 48080 ft. | | |

Correction for curvature and refraction in feet = $\frac{1}{2}$ sq. of dist. in miles.

| | |
|---------------------|----------|
| log. distance miles | 4,548,63 |
| log. 4 | 0,60206 |
| A. C. log. 7 | 9,15490 |
| log. 623 ft. | 2,79422 |

| | <i>log. feet.</i> | <i>log. miles.</i> | <i>miles.</i> |
|------------------------------------|-------------------|--------------------|---------------|
| Log. distance: St. Elias — E. base | 5,249,350 | 4,526,746 | 33.63 |
| Log. tan 5° 37' | 8,992,750 | 4,526,746 | |
| | 17,462 | 4,242,100 | 9,154,902 |
| Curvature and refraction | 646 | | |
| E. base above sea | 10 | log. 646 ft. | 2,810,394 |
| St. Elias above sea | 48118 ft. | | |

Mean elevation above sea level = 48099 ft.; or in round numbers 48,400 ft.

Mr. A. Lindenköhl, of the U. S. Coast and Geodetic Survey, and Mr. S. S. Gannett have each computed the geographic position of Mount St. Elias, using the azimuth and angle of elevation of the mountain obtained by the U. S. Coast Survey at Port Mulgrave in 1874,³ and the elevation given above. From

³ Report of the Superintendent of the U. S. Coast Survey for 1875, Appendix 10, pp. 157-188.

these data the approximate position of Mount St. Elias was found to be:

$$\begin{aligned}\text{Lat., } 60^{\circ} 17' 51'' \text{ N.} \\ \text{Long., } 140^{\circ} 55' 30'' \text{ W.}\end{aligned}$$

The computation by which these results were obtained is given below:

Computation of Geographic Position of Mount St. Elias.

| | |
|---|---------------|
| Azimuth: Port Mulgrave to Mount St. Elias | 142° 17' 17'' |
| Diff. azimuth | — 59' 55" |
| + 180° | + 180° |
| Azimuth: Mount St. Elias to Port Mulgrave | 321° 17' 22'' |

| <i>Latitude.</i> | | <i>Longitude.</i> | |

| Log. diff. azimuth — 3595'' | 3.55565 |

A, B and C are terms depending on the size and figure of the earth and the latitude of the place.

The geographic position of Mount St. Elias is of popular interest in connection with the boundaries of Alaska.

In the convention between Great Britain and Russia,^{*} wherein the boundaries of Alaska are supposed to be defined, it is stated that the boundary, beginning at the south, after leaving Portland channel, shall follow the summit of the mountains situated parallel to the coast as far as the 141st meridian, and from there northward the said meridian shall be the boundary to the Arctic ocean. "Whenever the summit of the mountains between Portland channel and the 141st meridian " shall prove to be at the distance of more than ten marine leagues from the ocean, the limit between the British possessions and the line of coast which is to belong to Russia, above mentioned, shall be formed by a line parallel to the windings of the coast and which shall never exceed the distance of ten marine leagues therefrom."

As Mount St. Elias is approximately in longitude $140^{\circ} 55' 30''$ west from Greenwich, as already shown, it is therefore only $4'$ and $30''$ of longitude or $2\frac{1}{2}$ statute miles east of the boundary of the main portion of Alaska. Its distance from the nearest point on the coast is 33 statute miles. There is no coast range in southeastern Alaska parallel with the coast within the limits specified by the treaty, and the boundary must therefore be considered as a line parallel with the coast and ten marine leagues, or $31\frac{1}{2}$ statute miles, inland. The mountain is thus one and one-half miles south of the boundary and within the territory of the United States. Its position is so near the junction of the boundary separating southeastern Alaska from the Northwest Territory with the 141st meridian that it is practically a corner monument of our national domain.

^{*} Message from the President of the United States, transmitting Report on the boundary line between Alaska and British Columbia. 50th Congress, 2d session, Ex. Doc. No. 146, Senate, 1889.
